ABOUT THE COMPANY

RAK Ceramics is a global hi-tech manufacturer of lifestyle ceramics solutions specialising in high-quality tiles, sanitaryware, tableware and faucets.

One of the largest ceramics manufacturers in the world, with an annual production capacity of 117 million square metres of tiles, 4.6 million pieces of sanitaryware, 24 million pieces of porcelain tableware and a distribution network that spans over 160 countries.

The Ras Al Khaimah-based public-listed company was established in 1989 by H.H. Sheikh Saud Bin Saqr Al Qasimi, Ruler of Ras Al Khaimah and UAE's Supreme Council Member. Now under the vision and leadership of Sheikh Khaled Bin Saud Al Qasimi, Chairman of RAK Ceramics, the company is set to continue the same rapid growth which established the business as a powerhouse in just 25 years.

Globally recognised as a world-class leader in its field, under the strategic leadership of CEO Abdallah Massaad, RAK Ceramics continues to position itself as a premium international brand.

Specialising in high-quality ceramic wall and floor tiles, gres porcelain, and sanitaryware, RAK Ceramics uses more than 10,000 production models (tiles) and 13,000 design pieces (sanitaryware), with new designs being added every week to its portfolio. Tiles are manufactured in a variety of sizes, from 10x10cm up to 135x305cm, as well as bespoke sizes – the widest range offered in the ceramics field.

CERAMIC TILES

The International Organisation for Standardization (ISO) classifies dry-pressed ceramic tiles into 5 groups, according to their water absorption :

CERAMIC TILE CLASSIFICATION ACCORDING TO INTERNATIONAL STANDARD ISO 13006:2012 (E) \ European Norm EN14411:2012

Method of Production	Dry- Pressed Ceramic Tiles				
Water Absorption	E <= 0.5%	0.5% < E <= 3%	3% < E <= 6%	6% < E <= 10%	E > 10%
Body Group	Bla	Blb	Blla	Bllb	Blll

Classification of Resistance to Abrasion - Glazed Tiles

- Class 0

Glazed tiles in this class are not recommended for use on floors.
- Class 1

Floor coverings in areas that are walked on essentially with soft-soled footwear or bare feet without scratching dirt (for example residential bathrooms and bedrooms without direct access from the outside).
- Class 2

Floor coverings in areas that are walked on by soft-soled or normal footwear with occasional small amounts of scratching dirt (for example rooms in the living areas of homes but with the exception of kitchens, entrances, and other rooms which may have lot of traffic.) This does not apply to abnormal footwear - for example hob-nailed boots.
- Class 3

Floor coverings in areas that are walked on more often with normal footwear and small amounts of scratching dirt (for example residential kitchens, halls, corridors, balconies, lobbies and terraces). This does not apply to abnormal footwear - for example hob-nailed boots.
- Class 4

Floor coverings that are walked on by regular traffic with some scratching dirt so that the conditions are more severe than class 3 (for example entrances, commercial kitchens hotles, exhibition and salerooms).
- Class 5

Floor coverings that are subject to severe pedestrian traffic over sustained periods with some scratching dirt, so that the conditions are the most severe for which glazed floor tiles may be suitable (for example public areas such as shopping centres, airport concourses, hotel foyers, public walkways and industrial applications).
